

Carbon Landscape Bitterns Habitat Survey

Recorder name(s)		Survey Point Grid Reference e.g. SD 58154 03855	
Site name		Date e.g. 05/05/2018	
Start time		End time	

To be conducted annually, unless conditions change significantly between visits in the same year. If so carry out a further habitat survey. Survey the vegetation within the reedbed only.

% of survey area covered by reeds (this is just the tall Common Reed, Phragmites australis)	%
% of survey area covered by trees / shrubs (e.g. sapling trees indicating successional change)	%
% of survey area covered by other herbaceous plants (e.g. Bulrush, Meadowsweet, or other aquatic plants)	%
% of open water within the reedbed	%
Any other important habitat observations	

If possible, please take photos of the reedbed from your survey point and upload them when you submit your habitat data via gmwildlife.org.uk
